

BACKGROUND MATERIALS

Lecture 4 - Case Study "Going Circular"

PLANETARY HEALTH CASE STUDY

To see a local example of how urban development and environmental challenges intersect, we highly recommend this case study by the Planetary Health Alliance. This is a bit longer as text and we recommend to prepare the reading beforehand.

- Go to www.planetaryhealthalliance.org
 - Search for "Education"
 - click on "case studies"
 - Download the case study n°4 - *Going Circular*

Read the case study and discuss:

- How do urban development and environment intersect here?
- What role does the history of the area play?
- What are advantages and dangers of privatizing resources?
- What parts of the case study do you find inspirational?
- How do urban development and planetary health intersect in your own context?

Going Circular

How Restoring a River Ecosystem in Chile's Capital City has Benefited Human Health and Economics

If you are facilitating this discussion, you can also download the Teaching Guides to find some inspiration for discussion questions.
